

## **7 EASY (10 Questions)**

**Q1.** What is the primary purpose of Group Policy?

- A. Backup management
- B. Centralized configuration management
- C. Disk partitioning
- D. Software compilation

**Q2.** Which tool is used to manage Group Policy centrally?

- A. gpedit.msc
- B. secpol.msc
- C. gpmc.msc
- D. lusrmgr.msc

**Q3.** Which policy applies only to a single standalone computer?

- A. Domain GPO
- B. Site GPO
- C. Local Policy
- D. OU GPO

**Q4.** Which acronym defines the Group Policy processing order?

- A. OU-S-D-L
- B. D-L-S-O
- C. LSDOU
- D. SODLU

**Q5.** Where are Group Policy templates stored on a domain controller?

- A. NTDS.DIT
- B. Registry only
- C. SYSVOL
- D. Program Files

**Q6.** Which policy controls password complexity?

- A. Audit Policy
- B. Account Policy
- C. User Rights Assignment
- D. Security Options

**Q7.** Which GPO setting applies at computer startup?

- A. User Configuration
- B. Computer Configuration
- C. Preference Configuration
- D. Profile Configuration

**Q8.** Which command forces immediate Group Policy refresh?

- A. gpedit /force

- B. gpoadppl
- C. gpupdate /force
- D. refreshpol

**Q9.** Which policy category controls who can log on locally?

- A. Account Policy
- B. Audit Policy
- C. User Rights Assignment
- D. Administrative Templates

**Q10.** Which GPO feature prevents parent GPOs from applying?

- A. Enforced
- B. Block Inheritance
- C. Security Filtering
- D. WMI Filter

---

## ☐ **MEDIUM (15 Questions)**

**Q11.** Which Group Policy component is stored in Active Directory?

- A. Group Policy Template (GPT)
- B. Group Policy Container (GPC)
- C. Registry.pol
- D. admx files

**Q12.** What happens if two GPOs configure the same setting?

- A. Both are applied
- B. First applied wins
- C. Last applied wins
- D. Setting is ignored

**Q13.** Which GPO setting type is registry-based?

- A. Scripts
- B. Preferences
- C. Administrative Templates
- D. Folder Redirection

**Q14.** Which GPO feature forces child OUs to apply a policy?

- A. Block inheritance
- B. Enforced
- C. Loopback processing
- D. Delegation

**Q15.** Which filtering method applies GPOs based on OS version?

- A. Security filtering

- B. OU filtering
- C. WMI filtering
- D. Site filtering

**Q16.** Which tool displays Resultant Set of Policy?

- A. gpmmc.msc
- B. rsop.msc
- C. secpol.msc
- D. perfmon.msc

**Q17.** Which policy prevents users from accessing Control Panel?

- A. Account Policy
- B. Audit Policy
- C. Administrative Template
- D. Security Options

**Q18.** What is the default Group Policy refresh interval for clients?

- A. 5 minutes
- B. 30 minutes
- C. 60 minutes
- D. 90 minutes

**Q19.** Which GPO feature allows different policies for users on the same machine?

- A. Enforced
- B. Loopback processing
- C. Inheritance
- D. Delegation

**Q20.** Which policy type configures software installation?

- A. Local Policy
- B. Computer Configuration
- C. Security Policy
- D. Account Policy

**Q21.** Which policy is applied first during processing?

- A. Domain
- B. OU
- C. Site
- D. Local

**Q22.** Which issue commonly causes GPOs not to apply?

- A. DNS misconfiguration
- B. Insufficient RAM
- C. Disk fragmentation
- D. Disabled firewall

**Q23.** Which folder must replicate correctly for GPO consistency?

- A. Program Files
- B. NTDS
- C. SYSVOL
- D. Temp

**Q24.** Which GPO feature allows targeting by user or group?

- A. WMI filtering
- B. Block inheritance
- C. Security filtering
- D. Loopback

**Q25.** Which command generates a report of applied GPOs?

- A. gpedit
  - B. gpresult /r
  - C. gpolist
  - D. rsync
- 

## **HARD (15 Questions)**

**Q26.** Why should GPOs not be linked at the domain root excessively?

- A. Increased schema size
- B. Reduced flexibility and troubleshooting complexity
- C. DNS failure
- D. Slower disk I/O

**Q27.** What happens when Block Inheritance and Enforced conflict?

- A. Block Inheritance wins
- B. Enforced wins
- C. Both cancel
- D. Neither applies

**Q28.** Which policy processing is evaluated client-side?

- A. Security filtering
- B. OU inheritance
- C. WMI filtering
- D. Enforced

**Q29.** Which scenario best suits loopback processing (Replace mode)?

- A. Laptop users
- B. Kiosk or classroom computers
- C. File servers
- D. Domain controllers

**Q30.** Why does SYSVOL replication failure impact GPOs?

- A. Users cannot log in
- B. Policies cannot be read by clients
- C. AD database corruption
- D. DNS stops

**Q31.** Which security risk occurs with overly permissive GPO delegation?

- A. Disk exhaustion
- B. Unauthorized policy changes
- C. Slow logon
- D. Replication latency

**Q32.** Which GPO design practice improves performance?

- A. Many small GPOs
- B. One large GPO
- C. Linking at root only
- D. Disabling SYSVOL

**Q33.** Why is WMI filtering slower than security filtering?

- A. Server-side evaluation
- B. Client-side queries
- C. DNS dependency
- D. AD replication

**Q34.** Which policy setting can break domain logon if misconfigured?

- A. Wallpaper policy
- B. Password policy
- C. Screensaver timeout
- D. Drive mapping

**Q35.** Which scenario requires separate user and computer GPOs?

- A. Home PCs
- B. Servers only
- C. Enterprise environments
- D. Test labs

**Q36.** What is the primary risk of conflicting GPOs?

- A. Disk failure
- B. Unpredictable system behavior
- C. Network outage
- D. Backup corruption

**Q37.** Which GPO setting enforces BitLocker encryption?

- A. Account Policy
- B. Administrative Templates

- C. User Rights Assignment
- D. Audit Policy

**Q38.** Why should GPO changes be tested before production deployment?

- A. Reduce replication
- B. Prevent widespread outages
- C. Improve speed
- D. Save storage

**Q39.** Which GPO-related attack involves malicious policy changes?

- A. Pass-the-Hash
- B. GPO tampering
- C. DNS spoofing
- D. ARP poisoning

**Q40.** Which Group Policy best practice improves security posture?

- A. Single admin manages all GPOs
- B. Least privilege delegation
- C. Disable auditing
- D. Apply policies manually
